

Handout 1.1: Hazard Hunt

Name: _____ Date: _____ Team: _____

Directions: There are hazards planted at every station in this room. Your team has eight minutes to find them. At each station: look, do not touch; write, do not fix; whisper. For every hazard you find, write what it is, circle its family, write what could happen, and write one way to prevent it. When the timer ends, go back to home base for Part 2.

Word bank: the six hazard families

Every hazard belongs to one of these six families. If it can burn, cut, trip, spark, or make you sick, it is a hazard.

Family	What it means	Example
Burns	Hot pans, hot water, steam, hot oven	A pot handle turned out over the edge
Cuts	Anything sharp	A tool hidden under suds in the sink
Falls	Anything you can slip or trip on	A wet towel on the floor
Fire	Anything that can catch	A paper towel next to a burner
Electrical	Cords, plugs, water near outlets	A cord draped across a burner
Food contamination	Germs getting into food	Raw chicken touching bread

Word bank in other languages

[Check with a native speaker before printing.]

English	Turkish	Portuguese	Spanish
hazard	tehlike	perigo	peligro
burn	yanık	queimadura	quemadura
cut	kesik	corte	corte
fall	düşme	queda	caída
fire	yangın	fogo	fuego
sick	hasta	doente	enfermo

Part 1: The hunt

Circle the family for each hazard. If you find two hazards at one station, write the second one on the back.

Station	What is the hazard?	Family (circle one)	What could happen?	How do you prevent it?
1		Burns / Cuts / Falls / Fire / Electrical / Food		To prevent this, you should _____
2		Burns / Cuts / Falls / Fire / Electrical / Food		To prevent this, you should _____
3		Burns / Cuts / Falls / Fire / Electrical / Food		To prevent this, you should _____
4		Burns / Cuts / Falls / Fire / Electrical / Food		To prevent this, you should _____
5		Burns / Cuts / Falls / Fire / Electrical / Food		To prevent this, you should _____
6		Burns / Cuts / Falls / Fire / Electrical / Food		To prevent this, you should _____

Hazards our team found: _____ out of 12.

Part 2: Our team's top five

Of everything your team found, choose the five that could hurt someone the worst in this room. Rank them 1 to 5, with 1 the most serious. For each one, write one sentence that says why it is that serious. Every team member writes the team's list on their own sheet.

Rank	Hazard	Why it is this serious (one sentence)
1		

2		
3		
4		
5		

Grade 8 stretch: next to each hazard, write which rule in the Room and Lab Agreement it breaks. Then write a one-line accident report for your number 1, as if it had happened: what happened, when, and where; who was involved and who saw it; what was done; what we change.

Keep this sheet. Your team's top five becomes part of the class Kitchen Safety Contract in Lesson 1.4.

Teacher key

There is no single right answer for Part 1, because the planted hazards are the teacher's own. Use the list below to check that a station's hazard was named, put in the right family, and given a prevention step that would actually work. The stations and hazards here are the ones suggested in Lesson 1.1; replace them with your own. *[Sal: write your real station list here after you stage the room, and keep the photos.]*

Station	Planted hazard	Family	What could happen	A prevention step that works
1	Pot handle turned out over the edge of the stove	Burns	Someone bumps it and boiling water spills on them	Turn handles in, toward the back of the stove
1	Cord draped across a burner	Electrical (accept Fire with a reason)	The cord melts, shocks someone, or catches fire	Keep cords off the stove; unplug when not in use
2	Wet towel on the floor	Falls	Someone slips carrying something hot	Pick it up; hang towels; wipe spills right away
2	Cabinet door open at head height	None of the six fits neatly; accept Falls (a bump or a stumble) or "other" with a reason	Someone stands up into it	Close cabinets and drawers every time
3	Knife or shears in the sink under suds	Cuts	A hand reaches in and gets cut	Never leave sharp tools in the sink; wash and put away right away
4	Raw chicken (prop) touching bread on a cutting board	Food contamination	Germs move from raw meat to food that will not be cooked	Separate boards; raw meat away from ready-to-eat food; wash hands and boards between
5	Unlabeled spray bottle on the counter	Food contamination (accept Burns)	Someone uses a cleaner on food or gets it on	Label every bottle; keep cleaners away

		or “chemical” with a reason)	skin or in eyes	from food; know where the Safety Data Sheets are
5	Oven mitt with a hole	Burns	Heat comes through the hole	Use a whole, dry mitt; throw out damaged ones
6	Paper towel roll touching a burner grate	Fire	The paper catches	Nothing on the stove that is not a pot
6	Wet mitt hanging on the oven handle	Burns	Steam goes through wet cloth and burns the hand	Dry mitts only

Part 2 is scored complete, partial, or missing for daily work: complete means five hazards ranked with a sentence each that names the harm; partial means three or four; missing means fewer than three or no sentences. The “why” sentences do not have to agree with your ranking; they have to give a reason.
