

Slides 1.13: Lab 2, Sheet Pan Nachos with a Label Discussion

Lesson 1.13, two days. Day 1: eleven slides. Day 2: nine slides (Day 2 slides stay up as the flowchart; the room is cooking, not watching). Build the deck from this outline. Student-facing text reads at grade 6 to 7.

Day 1: The quiz, roles, and the label math

Slide 1: Do now: the Label Reading Quiz

- Calculator out. Nothing else on the desk.
 - Fifteen minutes. This is the Topic 1.3 grade, and your ticket into tomorrow's lab.
 - Show your math on items 8, 9, and 10.
 - Finished early? Turn it over and write the nacho steps in order, as many as you can.
- Notes: Assessment 01.3 - Label Reading Quiz.md. Collect at minute 15, no exceptions; the retake and the review come later. The same ticket-in pattern as the performance check on Lab 1 Day 1. Then show the real order on the next slide.

Slide 2: The 40 minutes

Minutes	Step
0 to 5	Hands, hair, aprons, station check
5 to 10	Line the pan, layer the chips
10 to 16	Drain and top: beans, corn, cheese
16 to 26	Oven, 400 degrees F, 8 to 10 minutes. Salsa bar out. Label discussion.
26 to 32	Out, one minute on the trivet, plate, salsa bar
32 to 36	Eat
36 to 40	Clean and check

Notes: The hook: "Here is the real order. Tomorrow you cook it. Today you learn your job, and you find out how much salt is in it before you eat it." This is my flowchart from my May 2026 recipe sheet, rewritten for three stations of seven with the teacher at the oven.

Slide 3: The same eight roles as Lab 1

- Station Manager: station ready, keeps it clean the whole time, runs the end check, reports.
- Head Cook: reads the card, checks the pan, portions.
- Second Cook: lines the pan, layers the chips, spreads the beans and corn.
- Prep Cook: drains and rinses beans, drains corn.
- Helper Cook: brings supplies, rinses the cans, clears the hot pan path.
- Toppings Chief: measures and spreads the cheese, leads the math, speaks for the station during the bake.
- Plate Builder: lines up the plates, runs the salsa bar trip.
- Time Keeper: calls the minutes, counts the trivet minute, second set of eyes. Notes: Hand out role cards; they are the Lab 1 cards with the nacho jobs. Seven students: the Station Manager keeps time. Six: no Plate Builder; the Helper Cook runs the salsa bar. Five: no Toppings Chief either; the Second Cook adds the cheese and the Head Cook speaks for the station.

Slide 4: Highlight your steps

- Read your role card.
- On your paper copy of the station card, highlight every step with your role's name on it.
- Tell a partner your first step and your last step.
- Two minutes.

Slide 5: The two oven rules

1. Only the teacher opens the oven. If your pan is done and I am busy, you wait.
 2. The pan lands on the trivet and nobody touches it for one minute. The mitts stay by the trivet.
- Say them with me. Image: two simple pictures: an oven door with a teacher figure and a stop hand; a sheet pan on a trivet with a clock showing one minute. Notes: Have the class repeat both. The Time Keepers read them again at the end of the period.

Slide 6: Beans, drain and rinse. Corn, drain only.

- Beans: into the colander, drain, rinse under cold water until it runs clear, shake.
- Corn: into the colander, drain. Do NOT rinse.
- Rinsing the beans takes away about 40% of their sodium.
- Rinsing the corn makes the pan watery. Image: a colander at a sink with beans in it under running water; a second colander with corn and a crossed-out faucet.

Slide 7: The salsa bar

- Separate counter. Set up before class. Stays in the refrigerator until the pans go in.
- 2 tablespoons salsa is a serving (220 mg sodium). 2 tablespoons sour cream is a serving (15 mg).
- One station at the bar at a time. The Plate Builder serves. Plates come to the bar; the bar does not come to the plates.
- Plate Builders: draw the traffic pattern on the back of the station card. Two minutes. Image: a plain diagram: three station boxes with arrows to one salsa bar box.

Slide 8: The label math

- Four packages on your counter: chips, cheese, beans, corn.
- I do the chips line on the board. Your station does ONE more line: Station 1 cheese, Station 2 beans, Station 3 corn.
- Serving size, then sodium per serving. Then multiply by what OUR STATION puts in the pan (the table has the number). Report your number; I write all four on the board.
- Everyone: add the four. That is the pan. Divide by 7. That is you. Add the salsa bar.
- Compare to 2,300 mg, a whole day.
- Toppings Chief reads. Everyone computes. Ten minutes. Notes: Model the chips line on the board: 13 servings x 115 mg = 1,495 mg (two minutes). Stations compute their one line and report (three minutes); write the four lines on the board. Everyone finishes Parts 2 and 3 (five minutes).

Slide 9: The numbers

- Whole pan: about 3,100 mg.
- One person's share: about 445 mg.
- With salsa and sour cream: about 680 mg.
- That is about 30% of a day's sodium. From one snack.
- Often, or sometimes? Notes: Show only after the stations have their per-person numbers. Accept 600 to 750 mg; the real packages will differ a little.

Slide 10: The beans surprise

- The beans are the healthiest thing on the pan: 7 g fiber, 7 g protein, iron.
- They are also 400 mg sodium per serving. The biggest number on any one line.
- But the chips put more sodium in the PAN. Thirteen servings of chips.
- Per serving versus in the pan. Which one matters for your plate? Notes: This is the discussion. Then the swap question: which ONE ingredient would you change to cut the most sodium?

Slide 11: Exit line

- My role is ____.
- My first step is ____.
- The per-person sodium number is ____ mg.
- Time Keepers: read the two oven rules one more time. Notes: Sort by role. Any role with two or more blank first steps gets a reminder on tomorrow's slide. Day 1 timing: $15 + 7 + 2 + 10 + 3 + 3 = 40$.

Day 2: The lab

Slide 12: Before you touch anything

- Wash hands. Hair back. Apron on. Role card in hand.
- Head Cook: read the card aloud. Station Manager: check the counter against the list. Report “station ready.”
- The oven is at 400. It is mine.
- Clock starts when every station reports. Notes: This slide is up as they walk in.

Slide 13: Minutes 5 to 10: line and layer

- Foil in the pan, shiny side down, edges up.
- Chips in ONE even layer. You should see foil between some chips.
- Not a mountain. The cheese has to reach the bottom.
- Helper Cook: chips and cheese to the Second Cook and the Toppings Chief.

Slide 14: Minutes 10 to 16: drain and top

- Beans: drain and RINSE. Corn: drain ONLY.
- Second Cook spreads beans and corn. Toppings Chief: cheese over everything, edge to edge.
- Head Cook checks. Calls “pan ready.”
- Station Manager wipes spills. Helper Cook: cans rinsed and recycled.

Slide 15: Minutes 16 to 26: oven

- Pans go in. Teacher only.
- Plate Builder and Helper Cook: salsa and sour cream to the bar.
- Everyone else: home base. Label discussion.
- Time Keeper: call “two minutes” at 24.

Slide 16: While it bakes: the label discussion

- Your station’s per-person number?
- The ingredient with the most sodium per serving? The most in the pan? Why are those different?
- Which ONE ingredient would you swap to cut it most? What would that do to the taste?
- Is a snack you made yourself automatically healthier than the bag? Notes: Hold up the chip bag and the bean can. Toppings Chiefs answer for their stations. Ten minutes; use all of it.

Slide 17: Minutes 26 to 32: out and plate

- The pan lands on YOUR trivet. One minute. Time Keeper counts. Hands off.
- Head Cook portions: about one seventh per plate. Station Manager is served first.
- Plate Builder: plates to the salsa bar, one station at a time, when I call you. 2 tablespoons each.

- Station Manager: hot soapy water in the sink.

Slide 18: Minutes 32 to 36: eat

- Sit. Eat.
- The question at your table: is this healthier than the bag it came from? Use the number.
- Toppings Chief gets one answer from each person. Notes: Sit with a plate at one station. Score rubric row 2 on the clipboard as you walk.

Slide 19: Minutes 36 to 40: clean and check

- Station Manager reads the list. Everyone does their zone.
- Foil in the trash, pan washed and dried, tools washed, counter sprayed and wiped, sink empty, mitts and trivet home, chairs in, aprons hung.
- Station Manager reports “station clean.” I sign the card.
- On your way out, tell me: often or sometimes, and why.

Slide 20: Next time

- Quiz scores come back next period. One retake after a review; the best score counts.
- Keep the sodium number from your handout; the same math comes back in the \$40 project.
- Then Topic 1.4: planning a meal for a family, and the \$40 project. Notes: Keep the four empty packages; they are the review set for the quiz retake and a station in Lesson 1.16.
