

Handout 3.8: Toolkit Test Sheet and Toolkit Card

Name: _____ Date: _____ Period: _____

Directions: Page 1 is the test sheet. Write your baseline number from the do now. A baseline is your starting number, before any tool. Then test six tools. After each one, rate your stress from 1 (calm) to 5 (a lot). Write one word for how it felt. Honest numbers only. “It did nothing” is a true and useful answer. You may sit out any tool. If you do, write “sat out” and a one-word reason. Page 2 is your toolkit card. Cut it off and keep it. The test sheet is turned in. The card is yours.

Baseline. My stress right now, 1 to 5: _____ My earliest body signal (from the map):

#	Tool (picture cue)	The steps	Time	Rating after (1 to 5)	One word	Change from baseline (write + if it went up, 0 if it stayed the same, or how many points it dropped)
1	Box breathing (lungs and a square)	In for 4, hold 4, out 4, hold 4. Four rounds.	90 sec			

2	Two-minute walk (footprints)	The loop. No phone. No talking.	2 min			
3	Brain dump (a pencil and a pile)	Write everything in your head onto scrap paper. No order. No sentences. Fold it. Keep it or shred it.	2 min			
4	Music or movement break (a note)	The track plays. Stand, stretch, move, or sit and listen.	90 sec			
5	Talk to someone (two faces)	Partners. One talks for 45 seconds about anything. The other only listens, no advice. Switch.	2 min			
6	Sleep and food basics (a bed and a plate)	Not a live test. Answer two questions. Did I sleep in my sleep window (the hours	2 min			

		I planned in Lesson 2.6) last night? Y / N. Did I eat something real today? Y / N. Then rate how you think you would feel if both were yes.
