

Assessment 1.3: Label Reading Quiz

Unit: Unit 1, Kitchen Skills and Smart Eating (Nutrition and Wellness) **Topic:** 1.3 Nutrients, MyPlate, and Labels (Lessons 1.9 to 1.13) **When:** The first 15 minutes of the class period after Lab 2 (the opening of Lesson 1.14). The seven topic days are all lesson days, so the quiz opens the next period. **Category:** Topic assessments (25 percent). One retake after a review; best score counts. **Points:** 30 **Allowed:** a calculator. Nothing else.

Label Reading Quiz

Name: _____ Date: _____ Period: _____

Directions: Read both labels below before you start. Answer every item. Show your math for items 8, 9, and 10. You may use a calculator. Items 1 and 2 are matching; write the letter. Items 11 and 12 are short answer; write in complete sentences.

The two labels

Label A: Honey Crunch Oat Cereal Front of box says: “Made with whole grain. Good source of iron. Naturally sweetened with honey.”

Nutrition Facts	
Servings per container	about 10
Serving size	1 cup (40 g)
Calories	160
	% Daily Value
Total Fat 2 g	3%
Saturated Fat 0 g	0%
Trans Fat 0 g	
Cholesterol 0 mg	0%
Sodium 210 mg	9%
Total Carbohydrate 34 g	12%
Dietary Fiber 2 g	7%
Total Sugars 13 g	
Includes 12 g Added Sugars	24%
Protein 3 g	
Vitamin D 2 mcg	10%
Calcium 130 mg	10%
Iron 8 mg	45%
Potassium 100 mg	2%

Ingredients: whole grain oats, sugar, corn syrup, honey, brown sugar, canola oil, salt, natural flavor, vitamins and minerals.

Label B: Toasted Oat Rings (plain) Front of box says: “Whole grain oats. No artificial colors.”

Nutrition Facts	
Servings per container	about 12
Serving size	1 1/2 cups (39 g)
Calories	140
	% Daily Value
Total Fat 2.5 g	3%
Saturated Fat 0.5 g	3%
Trans Fat 0 g	
Cholesterol 0 mg	0%
Sodium 190 mg	8%
Total Carbohydrate 29 g	11%
Dietary Fiber 4 g	14%
Total Sugars 2 g	
Includes 2 g Added Sugars	4%
Protein 5 g	
Vitamin D 2 mcg	10%
Calcium 130 mg	10%
Iron 8 mg	45%
Potassium 250 mg	5%

Ingredients: whole grain oats, corn starch, sugar, salt, vitamin E (to keep fresh), vitamins and minerals.

Part 1: Label parts (5 points)

1. Match each label term to what it tells you. Write the letter on the line.

Term		Meaning
___ Serving size		A. How much of a full day's amount one serving gives you, based on 2,000 calories
___ Servings per container		B. Sugar the company put in, not sugar that was already in the food
___ Percent daily value		C. The amount of food that all the numbers on the label describe

___ Added sugars		D. How many servings are in the whole package
___ Dietary fiber		E. A nutrient to get more of; it helps digestion and keeps you full

Part 2: The six nutrients (6 points)

2. Match each nutrient to its main job in the body. Write the letter on the line.

Nutrient		Main job
___ Carbohydrates		A. Build and repair muscle and other body tissue
___ Proteins		B. Carry nutrients around the body and control body temperature
___ Fats		C. The body's main quick energy source
___ Vitamins		D. Build bones and teeth and carry oxygen in the blood (calcium, iron)
___ Minerals		E. Stored energy; protect organs; carry vitamins A, D, E, and K
___ Water		F. Help the body run its processes; found most in fruits and vegetables

Part 3: Reading the labels (9 points)

3. What is the serving size on Label A? (1 point)

4. How many servings are in one box of Label B? (1 point)

5. Which label has more added sugars per serving? How many grams more? (2 points)

Label ____ has more. It has ____ grams more added sugars per serving.

6. Use the 5 and 20 rule. Is the added sugars in one serving of Label A low, high, or in between? Circle one and write the percent you used. (1 point)

Low / In between / High. The percent daily value is ____%.

7. Use the 5 and 20 rule. Is the dietary fiber in one serving of Label B low, high, or in between? Circle one and write the percent you used. (1 point)

Low / In between / High. The percent daily value is ____%.

8. You pour 2 cups of Label A into a bowl. How many calories and how much sodium is that? Show your math. (2 points)

Calories: _____ Sodium: _____ mg

9. If someone ate a whole box of Label B in a week, how many calories would that be in total? Show your math. (1 point)

Part 4: Serving or portion (2 points)

10. A student named Devin pours Label B into a large bowl. It is about 3 cups. How many servings is that? How many grams of fiber is in the bowl? Show your math. (2 points)

Servings: _____ Fiber: _____ g

Part 5: Credible sources (2 points)

11. You want to know if Label A is a healthy breakfast. Four sources say something about it. Which ONE is the most credible, and why? Use at least one of the four source-check questions (who wrote it, what do they sell, what is the evidence, when was it posted) in your answer. (2 points)

- Source W: A video with 4 million views by a fitness influencer who sells a protein powder. It says all cereal is “junk.”
- Source X: The cereal company’s website. It says Honey Crunch Oat Cereal is “part of a balanced breakfast.”
- Source Y: An article on a hospital’s website written by a registered dietitian last year. It says to pick a cereal with 4 grams or more of fiber and under 10 grams of added sugars per serving.
- Source Z: A comment under the video that says “my cousin eats it every day and he is fine.”

Most credible: Source _____ because _____

Part 6: The better choice (6 points)

12. Which cereal is the better choice for breakfast, Label A or Label B? Write three sentences.

- Sentence 1: your choice.
- Sentence 2: two numbers from the labels that support it (name the nutrient and the amount for each cereal).
- Sentence 3: the front of Label A says “Naturally sweetened with honey.” Using the ingredient list or the added sugars line, say whether that claim is misleading and why.

Teacher key

Total: 30 points. Standard lines checked are listed per item. All NYS lines are from the Nutrition and Wellness content module (N&W) unless marked CTE.

Item	Answer	Points	Standard lines checked
1	Serving size: C; Servings per container: D; Percent daily value: A; Added sugars: B; Dietary fiber: E	5 (1 each)	N&W 2. c); National FCS 14.2.4 (Lesson 1.11, Objective 1)
2	Carbohydrates: C; Proteins: A; Fats: E; Vitamins: F; Minerals: D; Water: B	6 (1 each)	N&W 2. a); CTE HSW 1. b); National FCS 14.2.1 (Lesson 1.9, Objective 1)
3	1 cup (40 g). Accept "1 cup."	1	N&W 2. c); National FCS 14.2.4
4	About 12	1	N&W 2. c); National FCS 14.2.4
5	Label A has more; 12 minus 2 = 10 grams more	2 (1 for the label, 1 for the number)	N&W 2. a) and c); CTE FCL 4. f); CDOS 3a Basic Skills
6	High; 24% (20% or more is high)	1 (both parts needed)	N&W 2. c); National FCS 14.2.4 (the 5 and 20 rule)
7	In between; 14% (more than 5%, less than 20%)	1 (both parts needed)	N&W 2. c); National FCS 14.2.4
8	2 cups is 2 servings. Calories: $2 \times 160 = 320$. Sodium: $2 \times 210 = 420$ mg	2 (1 each; math shown)	N&W 2. c); CTE FCL 4. f); CDOS 3a Basic Skills (Lesson 1.11, Objective 2)
9	$12 \times 140 = 1,680$ calories. Accept 1,680 or "about 1,680."	1	N&W 2. c); CDOS 3a Basic Skills
10	3 cups divided by $1\frac{1}{2}$ cups = 2 servings. Fiber: $2 \times 4 = 8$ g	2 (1 each; math shown)	N&W 2. a); National FCS 14.3.1 (Lesson 1.10, serving versus portion)

11	Source Y. Full credit for any reason tied to a source-check question: written by a registered dietitian (who wrote it), on a hospital site that is not selling cereal or powder (what do they sell), gives a checkable number for fiber and sugar (evidence), posted last year (when). Half credit for Source Y with a reason like “it sounds professional.” No credit for W, X, or Z.	2	N&W 2. c); CTE PSI 4. Research Applications in CTE b) b.; National FCS 14.2.4 (Lesson 1.12, Objective 2)
12	Better choice: Label B (accept Label A only if the student argues it with two correct numbers, for example iron and calcium are equal so the tiebreak is taste; this is rare and should be a 4 at most). Sentence 2, any two correct pairs: added sugars 12 g versus 2 g; fiber 2 g versus 4 g; sodium 210 mg versus 190 mg; protein 3 g versus 5 g; calories 160 versus 140. Sentence 3: the claim is misleading because honey is the third sweetener on	6: choice 1; two correct numbers 2 (1 each); the claim judged misleading 1; evidence from the ingredient list or added sugars line 2	N&W 2. c); CTE FCL 4. e) and f); National FCS 14.2.4 and 3.5.6 (Lesson 1.11, Objectives 2 and 3)

	the list, after sugar and corn syrup, and the label shows 12 g of added sugars (24% DV), so most of the sweetness is not honey.		
--	---	--	--

Scoring notes

- 24 to 30: got it. 18 to 23: review the items missed and offer the retake. Under 18: retake after a one-on-one review with the Spot the Trick handout.
- Item 12 is the one to read carefully. A student who picks B with no numbers has the opinion, not the skill; that is a 1 of 6.
- Items 8, 9, and 10 are the percent daily value and multiplication skills that the \$40 project math check (Lesson 1.19) builds on. Note who missed them.

ELL and IEP versions

- ELL: the two labels stay the same; items 1 and 2 include the word bank from Vocabulary 01.md in Turkish, Portuguese, and Spanish; items 11 and 12 may be answered in short phrases with the sentence frames "Source ___ is credible because " **and** "Label ___ is better because ___ has ___ and ___ has ___."
- IEP and 504: extended time; the quiz may be read aloud; items 11 and 12 may be answered orally and recorded by the teacher; a calculator is already allowed for everyone.
- Grade 6 support: give items 1 through 10 and item 12 without sentence 3 (25 points; scale to 30).
- Grade 8 stretch: add one item: "Label B's fiber is 4 g. The daily value for fiber is 28 g. Compute the percent daily value and check it against the label." (4 divided by 28 = 0.143, about 14%; the label says 14%.) Bonus 2 points.

Sources

- Label numbers are typical of store brand oat cereals and were written for this quiz; they are not from a specific product. The daily values used for the percents are the FDA's 2020 label values (added sugars 50 g, fiber 28 g, sodium 2,300 mg, iron 18 mg, calcium 1,300 mg, vitamin D 20 mcg, potassium 4,700 mg).
- Standards: NYS N&W module lines 2. a) and 2. c); CTE HSW 1. b); CTE FCL 4. e) and f); CTE PSI 4. b) b.; CDOS 3a Basic Skills; National FCS 3.0 competencies 14.2.1, 14.2.4, 14.3.1, 3.5.6. All quoted in the Lesson 1.9 to 1.13 files.
