

Slides 01.19: Peer Math Check and MyPlate Check

Lesson 1.19, one day, 11 slides.

Slide 1: Do now

- A line from a plan: “Shredded cheese, 8 oz bag, \$2.49, need 16 oz, cost \$2.49.”
- Find the mistake. Notes: Two bags needed, cost \$4.98, running total is \$2.49 short. Ask how many caught it.

Slide 2: That mistake is in this room

- It is on at least one plan here.
- Today another team finds it before the store does.
- A second set of eyes catches what the first set stopped seeing.

Slide 3: The four checks

1. The arithmetic: every line and the running total, from line 1.
2. The units: every price has one, and the number to buy matches the size.
3. The cap: \$40 or under; pantry items at \$0.
4. The plate: four MyPlate groups with real dishes; no rule on the family card broken. Image: four icons: a calculator, a ruler, a \$40 bill with a line under it, a plate.

Slide 4: How to say it

- Weak: “The math is wrong.”
- Strong: “Line 4: two bags needed, cost should be \$4.98, total goes to \$38.20.”
- One thing the plan did well. One specific change. Both written so they can act without asking. Notes: Ask: what makes the strong comment strong? It says where and what.

Slide 5: The rules of the check

- Colored pen. Mark, do not fix. Their team decides what to change.
- Taste does not count today. Only the four checks.
- Their family card stays with their plan. Read it.

Slide 6: Swap

- Team 1 checks Team 2. Team 2 checks Team 3. Team 3 checks Team 1.
- Plans, family cards, and circulars move together.
- Checking roles: Shoppers verify prices; Planner and Materials Manager recalculate; Nutrition Checker runs the plate; Recorder fills the sheet; Presenter writes the comments.
- 14 minutes. Image: a timer graphic set to 14:00.

Slide 7: While you check, ask

- Which line did the running total go wrong on?
- Which of the five groups is missing?
- Which rule on their card would you flag, and which dish?

Slide 8: Return and read

- Plans go back.
- Two minutes of silent reading.
- Then the checking team's Presenter answers questions at your table for two minutes.

Slide 9: Revise

- Fix what the check found. One change at a time.
 - Update the running total.
 - Log every change with one sentence.
 - Clean check? Find one improvement of your own: a cheaper swap or a missing group.
- Notes: 7 minutes. Sign the final total.

Slide 10: Exit card

- 3 things the check sheet looked at
- 2 changes your team made after feedback, and why
- 1 sentence: what made the feedback you got useful, or not

Slide 11: Tomorrow

- You write the station card from your plan.
- Ingredients for seven, eight to ten steps, roles, a flowchart, safety reminders.
- I sign it. I shop it. The day after, you cook it.
