

Handout 05.18: Display Card, Explanation Planner, and Feedback Slip

Name: _____ Date: _____ Station: _____ Display table: _____

Lesson 5.18, two days. Print page 1 on the heaviest paper the copier will take. Pages 2 to 4 are regular paper.

Word bank: before, after, stitch, useful, hard Turkish: önce, sonra, dikiş, kullanışlı, zor
Portuguese: antes, depois, ponto, útil, difícil Spanish: antes, después, puntada, útil, difícil

Page 1. The display card

Cut on the outside line. Fold the bottom tab back to make it stand, or clip it to a binder clip. Write in pencil first, then go over it in marker.

Your name goes on the BACK only. These cards get photographed for the website.

WAS

What it was, and where it came from.

NOW

What it is now, and who will use it, and for what.

STITCHES

Which of the four stitches you used, and where on the item.

HARD PART

The one thing that was hard, and what you did about it.

EXTRA (only if you added something)

The reinforcement or detail you added, and why there.

CARE (grade 8 stretch, optional)

How to wash and care for this item.

(fold tab)

Back of the card: Name: _____ Station: _____

Page 2. The 45-second explanation planner

Four sentences. Point at the item while you say each one. Read it out loud at your desk and cut words until it fits in 45 seconds.

1. This was a _____.
2. Now it is a _____ for _____, who will use it to _____.
3. I used the _____ stitch here (point) and the _____ stitch here (point).
4. The hard part was _____ and I fixed it by _____.

Optional fifth sentence, if you have time left: The thing I would change with two more days is _____.

Practice log (Lesson 5.18 Day 1)

Round	My partner	Time	What they told me to fix
1		_____ sec	
2		_____ sec	

The one line I still need to fix: _____

Day 2 count

Tick each time you give your 45 seconds.

[] [] [] [] [] [] [] []

Or: [] I gave it one-on-one to the teacher (the no-presentation option, worth the same).

Questions I was asked, and what I answered:

Sentence frames

- This was a ____.
- Now it is a ____ for ____.
- I used the running stitch here because ____.
- I used the backstitch here because it is strong.
- The hard part was ____.
- I fixed it by ____.

Page 3. Feedback slips (cut these apart, eight per student)

Fill in at least two, at tables that are not your own. Leave each slip next to the item it is about. **Name the feature, not the person.** “It’s nice” does not count.

TWO STARS AND A STEP Item: _____ Table: _____

Star 1: This works, and here is the part I mean: _____

Star 2: This works, and here is the part I mean: _____

Step, one thing to try: _____

From: _____

TWO STARS AND A STEP Item: _____ Table: _____

Star 1: This works, and here is the part I mean: _____

Star 2: This works, and here is the part I mean: _____

Step, one thing to try: _____

From: _____

TWO STARS AND A STEP Item: _____ Table: _____

Star 1: _____

Star 2: _____

Step: _____

From: _____

TWO STARS AND A STEP Item: _____ Table: _____

Star 1: _____

Star 2: _____

Step: _____

From: _____

(Print four more of the same slip on the back of this page, or run the page twice.)

What counts as a feature

The stitching. The shape. The size. The closure. The idea. The material choice. The finishing of the edges. Whether it actually holds what it is supposed to hold. How the display card explains it.

Two examples

A useful slip: “Star 1: the whipstitch along the top edge is even all the way across, so nothing will fray. Star 2: the size is exactly right for a phone with a case on it. Step: try a bar tack where the loop joins, because that is where it will pull.”

A slip that gets sent back: “It’s really cool. I like the color. Nothing to change.”

Page 4. The vote ballot and the reflection

Ballot

One vote per category. You cannot vote for your own item. Describe the item if you do not know whose it is.

Most Useful (the item somebody would actually reach for):

Most Surprising Material (the item whose WAS line surprised you most):

Best Construction (the item whose stitching and finishing you would want on your own):

Reflection

Answer all five. Full sentences.

1. What did your item start as, and what is it now?

2. Which two stitches did you use, and why those two for this item?

3. What went wrong, and what did you do about it?

4. If you had two more days, what would you change, and what would you keep?

5. What is one thing you would tell a student who is about to do this project?

6. Grade 8 stretch: evaluate your own use of the design process. Which step did you do well, and which step did you skip?

Closure line (back of this page)

The item that changed my mind about what is possible was _____ (describe the item, no names), because _____.

Folder checklist before you hand it in

#	In the folder	[]
1	The finished item	[]
2	The display card, on its stand	[]
3	The design brief (Handout 05.15)	[]
4	The plan sheet with the teacher's initials (Handout 05.16)	[]
5	The paper mock-up	[]
6	The build milestones and finishing checklist, initialed (Handout 05.17)	[]
7	The explanation planner, this handout	[]
8	The reflection, all five prompts answered	[]
9	Rubric 05 with the self-assessment row filled in, score and evidence on all five criteria	[]
10	The slips other people wrote for me	[]
11	The peer review checklist I filled for my station partner	[]

Teacher key and scoring notes

The display card

Four fields required: WAS, NOW, STITCHES, HARD PART. EXTRA and CARE are optional and both count toward Exceeds. Check every card against the four fields at the end of Day 1. A card missing STITCHES or HARD PART is handed back with one instruction and finished in the first two minutes of Day 2.

The most common weak field is HARD PART, which becomes “everything” or “nothing.” Push for one spot on the item. Ask “which inch was the worst?”

Names on the back only, because the cards get photographed.

The 45 seconds

Four boxes on the clipboard per student, ticked live during Day 2 Step 3:

Box	What earns the tick
1. WAS	Names the original textile
2. NOW	Names the item and the user and the use
3. STITCHES	Names two taught stitches AND points at where each one is
4. HARD PART	Names one specific difficulty AND what they did about it

Four boxes is a Meets on criterion 5. A one-on-one explanation under the no-presentation option is scored on exactly these four boxes and the notes line says only that it was one-on-one.

The slips

Count them. Two minimum, at tables other than their own, each naming a specific feature and one specific suggestion. Read a few over shoulders during the walk and send one vague slip back, without saying whose it is. The rest improve immediately.

The reflection

Read against the five prompts. Prompt 3 (what went wrong and what you did) is the troubleshooting evidence and the best single line in the whole folder for judging criterion 2 at the Exceeds level. Prompt 6 is the grade 8 design-process self-evaluation and maps to CTE PSI 2. a) i.

The vote

Tally on chart paper while students write the reflection. Read the three definitions out loud before voting, or the class votes for whoever they like best. The three named categories

exist so neatness does not win everything: Most Surprising Material rewards the student who saw something in a towel, and Best Construction rewards even stitching.

No prize beyond the announcement and a photograph of the item.

Photographs

Photograph every item with its display card. No faces. No names. That photo set becomes the Unit 5 page on the website, the hallway display case, and next year's idea menu slides.
