

## Handout 06.13: Scaling Worksheet and Costing Sheet

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Station: \_\_\_\_\_ Option: \_\_\_\_\_

Lesson 6.13, two days. Day 1 is pages 1 to 3. Day 2 is pages 4 to 6. Page 3 is the pre-filled version. Page 5 is the short circular excerpt. Page 7 is the teacher key.

All prices are real Long Island supermarket prices to be refreshed from the current circular before teaching.

## Page 1. The three-step rule and your base recipe

### The three-step rule

1. **Divide** the number of portions you need by the number the recipe makes. That is your **scale factor**.
2. **Multiply** every ingredient by the scale factor.
3. **Round up** to the number of packages the store actually sells. Always up, never down.

### The worked example (do this one with the teacher):

A recipe makes 4 servings and needs 8 ounces of dry spaghetti. We need 28 portions.

- Step 1:  $28 \div 4 = 7$ . The scale factor is 7.
- Step 2:  $8 \text{ oz} \times 7 = \mathbf{56 \text{ oz}}$ .
- Step 3:  $56 \text{ oz} \div 16 \text{ oz per pound} = 3.5 \text{ lb}$ . The store sells 1 lb boxes. 3.5 rounds up to **4 boxes**.

**Why always up:** running out at minute 30 is the one mistake you cannot fix. Buying one extra box costs \$1.29. Not feeding six people costs the whole project.

### The base recipes (all make 4 servings). Find yours.

#### Option A: Spaghetti with Marinara and Parmesan (4 servings)

- 8 oz dry spaghetti
- 1 1/2 cups marinara sauce
- 1/4 cup shredded parmesan
- Water to fill the pot 3/4 full

#### Option B: Pizza Tortillas (4 servings)

- 4 flour tortillas, fajita size
- 1/2 cup pizza sauce
- 3/4 cup shredded mozzarella
- 20 pepperoni slices (5 each)

#### Option C: Bean and Cheese Burritos (4 servings)

- 4 flour tortillas, fajita size
- 3/4 cup refried beans
- 1/2 cup shredded Mexican cheese blend
- 1/4 cup salsa

#### Option D: Garlic Bread and Vegetable Tray (4 servings)

- 4 pieces of garlic bread (one 14 oz loaf makes about 12 pieces)
- 2 tablespoons softened butter
- 1/2 teaspoon garlic powder

- 1/4 lb baby carrots, washed and peeled

**Option E: No-Bake Cookie Dessert Cups (4 servings)**

- 8 chocolate sandwich cookies (2 each)
- 3/4 cup whipped topping
- 4 plastic cups, 9 oz

**Your scale factor**

Portions we need: **28** ÷ Recipe makes: \_\_\_\_\_ = Scale factor: \_\_\_\_\_

## Page 2. The scaling table and the conversion strip

### The scaling table (Day 1, Step 2)

Every ingredient gets a row. The Scale Lead reads each row aloud before it is written.

| Ingredient | Amount for 4 | × scale factor | Scaled amount | Unit the store sells in | Packages to buy (round UP) |
|------------|--------------|----------------|---------------|-------------------------|----------------------------|
|            |              | × _____        |               |                         |                            |
|            |              | × _____        |               |                         |                            |
|            |              | × _____        |               |                         |                            |
|            |              | × _____        |               |                         |                            |
|            |              | × _____        |               |                         |                            |
|            |              | × _____        |               |                         |                            |
|            |              | × _____        |               |                         |                            |

### The conversion strip (Day 1, Step 3). Fill this in with the teacher and the real packages.

| What you need to know                                                                      | The number                     |
|--------------------------------------------------------------------------------------------|--------------------------------|
| 1 cup = _____ fluid ounces                                                                 | 8                              |
| 1 pound = _____ ounces by weight                                                           | 16                             |
| 1 stick of butter = _____ tablespoons = _____ cup                                          | 8 tbsp = 1/2 cup               |
| 1 tablespoon = _____ teaspoons                                                             | 3                              |
| Shredded cheese: _____ ounces by weight is about 1 cup, so an 8 oz bag is about _____ cups | 4 oz = 1 cup, so 8 oz ≈ 2 cups |
| A 16 oz can of refried beans holds about _____ cups                                        | 1 3/4                          |
| A 14.3 oz pack of sandwich cookies holds about _____ cookies                               | 36                             |
| A 14 oz loaf of Italian bread makes about _____ serving pieces                             | 12                             |
| One aerosol can of whipped topping gives about _____ cups                                  | 2                              |
| An 8 oz pack of sliced pepperoni holds                                                     | 150                            |

|                   |  |
|-------------------|--|
| about ____ slices |  |
|-------------------|--|

### The two practice conversions

1. A recipe wants **3 cups** of broth. The store sells a **32 fluid ounce** box. Is one box enough? Show the math.

$3 \text{ cups} \times 8 \text{ fl oz} = \text{____ fl oz}$ . The box holds \_\_\_\_ fl oz. Enough? \_\_\_\_ Left over: \_\_\_\_ cups.

2. A recipe wants **2 1/2 cups** of shredded cheese. The store sells **8 ounce** bags. How many bags?

$2 \frac{1}{2} \text{ cups} \times 4 \text{ oz per cup} = \text{____ oz}$ . \_\_\_\_ oz  $\div$  8 oz per bag = \_\_\_\_ bags. Round up: \_\_\_\_ bags.

### The trap

Circle the right answer: **8 ounces on a bag of shredded cheese is** ( a weight / a volume ).

Write the sentence: "Eight ounces of shredded cheese is about \_\_\_\_ cups, not one cup, because \_\_\_\_\_."

### The yield check (Day 1, Step 4)

We need **30** portions: 28 students, the teacher, and one spare.

Our plan makes: \_\_\_\_ portions. Show how you know: \_\_\_\_\_

Circle one: **CLEAR 30** / **ADD \_\_\_\_ more of \_\_\_\_**

If we have spare portions, they will go to: \_\_\_\_\_

## Page 3. The pre-filled scaling table (grade 6 support, or anyone who needs it)

The scale factor is already entered. Your job is columns 4, 5, and 6.

### Option A: Spaghetti with Marinara

| Ingredient        | Amount for 4 | $\times 7$ | Scaled amount             | Store sells                  | Packages to buy |
|-------------------|--------------|------------|---------------------------|------------------------------|-----------------|
| Dry spaghetti     | 8 oz         | $\times 7$ | ____ oz =<br>____ lb      | 1 lb box                     | ____            |
| Marinara sauce    | 1 1/2 cups   | $\times 7$ | ____ cups =<br>____ fl oz | 24 oz jar                    | ____            |
| Shredded parmesan | 1/4 cup      | $\times 7$ | ____ cups                 | 6 oz bag ( $\approx 2$ cups) | ____            |

### Option B: Pizza Tortillas

| Ingredient          | Amount for 4 | $\times 7$ | Scaled amount             | Store sells                  | Packages to buy |
|---------------------|--------------|------------|---------------------------|------------------------------|-----------------|
| Flour tortillas     | 4            | $\times 7$ | ____                      | 20 count pack                | ____            |
| Pizza sauce         | 1/2 cup      | $\times 7$ | ____ cups =<br>____ fl oz | 14 oz jar                    | ____            |
| Shredded mozzarella | 3/4 cup      | $\times 7$ | ____ cups                 | 8 oz bag ( $\approx 2$ cups) | ____            |
| Pepperoni slices    | 20           | $\times 7$ | ____ slices               | 8 oz pack ( $\approx 150$ )  | ____            |

### Option C: Bean and Cheese Burritos

| Ingredient            | Amount for 4 | $\times 7$ | Scaled amount             | Store sells                               | Packages to buy |
|-----------------------|--------------|------------|---------------------------|-------------------------------------------|-----------------|
| Flour tortillas       | 4            | $\times 7$ | ____                      | 20 count pack                             | ____            |
| Refried beans         | 3/4 cup      | $\times 7$ | ____ cups                 | 16 oz can ( $\approx 1 \frac{3}{4}$ cups) | ____            |
| Shredded cheese blend | 1/2 cup      | $\times 7$ | ____ cups                 | 8 oz bag ( $\approx 2$ cups)              | ____            |
| Salsa                 | 1/4 cup      | $\times 7$ | ____ cups =<br>____ fl oz | 15.5 oz jar                               | ____            |

### Option D: Garlic Bread and Vegetable Tray

| Ingredient             | Amount for<br>4 | × 7 | Scaled<br>amount             | Store sells                 | Packages to<br>buy |
|------------------------|-----------------|-----|------------------------------|-----------------------------|--------------------|
| Garlic bread<br>pieces | 4               | × 7 | _____ pieces                 | 14 oz loaf (≈<br>12 pieces) | _____              |
| Softened<br>butter     | 2 tbsp          | × 7 | _____ tbsp =<br>_____ sticks | 1 lb, 4 sticks              | _____              |
| Garlic<br>powder       | 1/2 tsp         | × 7 | _____ tsp                    | 3.12 oz jar                 | _____              |
| Baby carrots           | 1/4 lb          | × 7 | _____ lb                     | 1 lb bag                    | _____              |

### Option E: No-Bake Cookie Dessert Cups

| Ingredient          | Amount for<br>4 | × 7 | Scaled<br>amount | Store sells               | Packages to<br>buy |
|---------------------|-----------------|-----|------------------|---------------------------|--------------------|
| Sandwich<br>cookies | 8               | × 7 | _____ cookies    | 14.3 oz pack<br>(≈ 36)    | _____              |
| Whipped<br>topping  | 3/4 cup         | × 7 | _____ cups       | aerosol can<br>(≈ 2 cups) | _____              |
| Plastic cups        | 4               | × 7 | _____ cups       | 50 count<br>pack          | _____              |

## Page 4. The Costing Sheet (Day 2)

Station budget: **\$20.00**. Write the running total after **every** line, not at the end.

| # | Item                                                              | Brand | Size | Price  | Price<br>per<br>ounce<br>(or per<br>count) | Packag<br>es | Line<br>cost | Runnin<br>g total |
|---|-------------------------------------------------------------------|-------|------|--------|--------------------------------------------|--------------|--------------|-------------------|
| 1 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 2 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 3 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 4 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 5 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 6 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 7 |                                                                   |       |      | \$     | \$                                         |              | \$           | \$                |
| 8 | Room<br>pantry<br>(foil,<br>spray,<br>salt,<br>spoons,<br>plates) | room  |      | \$0.00 |                                            |              | \$0.00       | \$                |

**Station total:** \$\_\_\_\_\_ Under the \$20.00 budget by: \$\_\_\_\_\_ OVER by: \$\_\_\_\_\_

**Cost per person** (total ÷ 28): \$\_\_\_\_\_

### The two questions to ask on every line

1. What does the **whole package** cost? That is what you pay.
2. What does **one ounce** cost? That is how you choose.

Worked example: store-brand shredded mozzarella, 8 oz, \$1.99.  $\$1.99 \div 8 = \mathbf{\$0.249 \text{ per ounce}}$ . Name brand, 8 oz, \$2.99.  $\$2.99 \div 8 = \mathbf{\$0.374 \text{ per ounce}}$ . The store brand is cheaper by 12.5 cents an ounce.

**The Unit 1 rule, still true:** you pay for the whole package, not the spoonful you use.

Page 5. Circular excerpt (Day 2). Use this if a full circular is too much, or if the store's circular is missing an item.

Prices verified week of March 20 to 26, 2026.

| Item                          | Brand        | Size           | Price  |
|-------------------------------|--------------|----------------|--------|
| Spaghetti                     | store brand  | 1 lb           | \$1.29 |
| Spaghetti                     | name brand   | 1 lb           | \$2.19 |
| Penne or ziti                 | store brand  | 1 lb           | \$1.29 |
| Marinara sauce                | store brand  | 24 oz          | \$2.79 |
| Marinara sauce                | name brand   | 24 oz          | \$3.99 |
| Marinara sauce                | store brand  | 45 oz          | \$4.99 |
| Pizza sauce                   | store brand  | 14 oz          | \$1.69 |
| Alfredo sauce                 | store brand  | 16 oz          | \$3.49 |
| Shredded mozzarella           | store brand  | 8 oz           | \$1.99 |
| Shredded mozzarella           | name brand   | 12 oz          | \$3.49 |
| Shredded Mexican cheese blend | store brand  | 8 oz           | \$1.99 |
| Shredded parmesan             | store brand  | 6 oz           | \$1.99 |
| Ricotta cheese                | name brand   | 32 oz          | \$4.99 |
| Cheese sticks                 | store brand  | 12 count       | \$3.99 |
| Flour tortillas, fajita size  | name brand   | 20 count       | \$3.49 |
| Flour tortillas, burrito size | name brand   | 16 count       | \$6.59 |
| Italian bread                 | store bakery | 14 oz loaf     | \$2.99 |
| Salted butter                 | store brand  | 1 lb, 4 sticks | \$3.99 |
| Salted butter                 | name brand   | 1 lb, 4 sticks | \$5.99 |
| Garlic powder                 | store brand  | 3.12 oz        | \$1.99 |
| Refried beans                 | name brand   | 16 oz can      | \$1.99 |
| Black beans                   | store brand  | 15 oz can      | \$1.19 |
| Instant rice                  | store brand  | 28 oz          | \$4.79 |
| Salsa                         | store brand  | 15.5 oz        | \$2.49 |
| Sour cream                    | name brand   | 16 oz          | \$2.49 |
| Pepperoni, pre-sliced         | name brand   | 8 oz           | \$4.99 |

|                                    |             |                 |         |
|------------------------------------|-------------|-----------------|---------|
| Bite-size cooked meatballs, frozen | name brand  | 40 oz, 80 count | \$14.99 |
| Half rotisserie chicken, cooked    | deli        | each            | \$3.99  |
| Deli-sliced turkey or ham          | deli        | 1 lb            | \$5.99  |
| Baby carrots, washed and peeled    | store brand | 1 lb bag        | \$1.99  |
| Grape tomatoes                     |             | 1 pint          | \$2.99  |
| Shredded lettuce, bagged           | store brand | 8 oz            | \$2.49  |
| Pre-diced tomatoes, refrigerated   |             | 8 oz cup        | \$2.49  |
| Chocolate sandwich cookies         | store brand | 14.3 oz         | \$2.99  |
| Chocolate sandwich cookies         | name brand  | 19.1 oz         | \$6.59  |
| Whipped topping, aerosol           | store brand | can             | \$2.99  |
| Whipped topping, aerosol           | name brand  | can             | \$4.49  |
| Brownie mix                        | name brand  | 18.4 oz         | \$2.99  |
| Rolled oats                        | store brand | 42 oz           | \$4.29  |
| Raisins                            | store brand | 15 oz           | \$3.49  |
| Tortilla chips                     | store brand | 13 oz           | \$2.99  |

| Shelf-stable milk                  | store brand | 1 quart         | \$2.99  |
| Large eggs                         | store brand | dozen           | \$3.49  |
| Plastic cups, 9 oz                 | store brand | 50 count        | \$3.99  |
| Plastic cups with lids             | store brand | 28 count        | \$3.99  |
| Gallon zip-lock bags               | store brand | box             | \$3.99  |
| Aluminum foil                      | store brand | roll            | \$3.99  |

## Page 6. The Swap Log and the Peer Check

### The swap log (Day 2, Step 3)

Three legal swaps: **store brand for name brand; a bigger package when the price per ounce drops and you will use it; cut a line that is not on the plate.**

A swap only counts if it saves at least **\$0.25** and does not break the allergy list or your station card.

| # | What we swapped out | What we swapped in | Old unit price | New unit price | Saved | What we gave up |
|---|---------------------|--------------------|----------------|----------------|-------|-----------------|
| 1 |                     |                    | \$             | \$             | \$    |                 |
| 2 |                     |                    | \$             | \$             | \$    |                 |
| 3 |                     |                    | \$             | \$             | \$    |                 |

**Total saved: \$\_\_\_\_\_ New station total: \$\_\_\_\_\_**

**Allergy recheck after the swaps.** Did any swap bring in a new allergen? Circle: YES / NO If YES, what and what we will do: \_\_\_\_\_

### Sentence frames for the swap log

| English                                                                    | Turkish                                                    | Portuguese                                                                  | Spanish                                                                                 |
|----------------------------------------------------------------------------|------------------------------------------------------------|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| We will buy ____ instead of ____ and save \$____.                          | ____ yerine ____ alacağız ve ____ dolar tasarruf edeceğiz. | Vamos comprar ____ em vez de ____ e economizar \$____.                      | Vamos a comprar ____ en lugar de ____ y ahorrar \$____.                                 |
| The store brand costs ____ per ounce. The name brand costs ____ per ounce. | Market markası onsuz . <b>Ünlü marka onsuz</b> .           | A marca do mercado custa ____ por onça. A marca famosa custa ____ por onça. | La marca del supermercado cuesta ____ por onza. La marca conocida cuesta ____ por onza. |
| We gave up ____ to stay under budget.                                      | Bütçeyi aşmamak için ____ vazgeçtik.                       | Abrimos mão de ____ para ficar no orçamento.                                | Renunciamos a ____ para no pasarnos del presupuesto.                                    |

### The peer check (Day 2, Step 4). Trade sheets with the station next door.

We are checking Station \_\_\_\_\_'s sheet. Checked by: \_\_\_\_\_

| Check                            | Initial |
|----------------------------------|---------|
| Every line has a size and a unit |         |

|                                                                                  |  |
|----------------------------------------------------------------------------------|--|
| The running total adds up (we redid it)                                          |  |
| The total is at or under \$20.00                                                 |  |
| The yield check clears 30                                                        |  |
| Nothing on the list is on the class allergy list, or the substitution is written |  |

One thing we would fix: \_\_\_\_\_

**Teacher signature (required before Lesson 6.15):** \_\_\_\_\_ **Date:** \_\_\_\_\_

## Teacher key

### Page 1: the scale factor

$28 \div 4 = 7$  for every option. A student who writes  $4 \div 28$  has the ratio upside down; the question is “how many times bigger,” so the target goes on top.

### Page 2: the practice conversions

1.  $3 \text{ cups} \times 8 = \mathbf{24 \text{ fl oz}}$ . The box holds **32 fl oz**. **Yes, enough**. Left over: **1 cup** ( $32 - 24 = 8 \text{ fl oz} = 1 \text{ cup}$ ).
2.  $2 \frac{1}{2} \text{ cups} \times 4 \text{ oz per cup} = \mathbf{10 \text{ oz}}$ .  $10 \div 8 = \mathbf{1.25 \text{ bags}}$ . Round up: **2 bags**.

### Page 2: the trap

8 ounces on a bag of shredded cheese is a **weight**. “Eight ounces of shredded cheese is about **2 cups**, not one cup, because shredded cheese is light and fluffy, so a cup of it weighs only about 4 ounces.”

### Page 3: the pre-filled tables, completed

**Option A** | Ingredient | Scaled | Packages | |—|—|—| | Dry spaghetti | 56 oz =  $3 \frac{1}{2} \text{ lb}$  | **4 boxes** | | Marinara sauce |  $10 \frac{1}{2} \text{ cups} = 84 \text{ fl oz}$  |  $84 \div 24 = 3.5$ , so **4 jars** | | Shredded parmesan |  $1 \frac{3}{4} \text{ cups}$  |  $1 \frac{3}{4} \div 2 = 0.875$ , so **1 bag** |

**Option B** | Ingredient | Scaled | Packages | |—|—|—| | Flour tortillas | 28 |  $28 \div 20 = 1.4$ , so **2 packs** | | Pizza sauce |  $3 \frac{1}{2} \text{ cups} = 28 \text{ fl oz}$  |  $28 \div 14 = 2.0$ , so **2 jars**, which is exactly enough with no margin. Say this out loud: an exact answer is legal but has no room for a spill. | | Shredded mozzarella |  $5 \frac{1}{4} \text{ cups}$  |  $5.25 \div 2 = 2.625$ , so **3 bags** | | Pepperoni slices | 140 |  $140 \div 150 = 0.93$ , so **1 pack**, which is tight. A team that buys 2 is not wrong, but it costs \$4.99 and puts them further over budget. |

**Option C** | Ingredient | Scaled | Packages | |—|—|—| | Flour tortillas | 28 | **2 packs** | | Refried beans |  $5 \frac{1}{4} \text{ cups}$  |  $5.25 \div 1.75 = 3.0$ , so **3 cans** exactly | | Shredded cheese blend |  $3 \frac{1}{2} \text{ cups}$  |  $3.5 \div 2 = 1.75$ , so **2 bags** | | Salsa |  $1 \frac{3}{4} \text{ cups} = 14 \text{ fl oz}$  |  $14 \div 15.5 = 0.90$ , so **1 jar** |

**Option D** | Ingredient | Scaled | Packages | |—|—|—| | Garlic bread pieces | 28 pieces |  $28 \div 12 = 2.33$ , so **3 loaves** | | Softened butter | 14 tbsp =  $1 \frac{3}{4} \text{ sticks}$  | **2 sticks**, which is **1 package** of 4 | | Garlic powder |  $3 \frac{1}{2} \text{ tsp}$  | **1 jar** (a 3.12 oz jar holds far more than  $3 \frac{1}{2} \text{ tsp}$ ) | | Baby carrots |  $1 \frac{3}{4} \text{ lb}$  | **2 bags** |

**Option E** | Ingredient | Scaled | Packages | |—|—|—| | Sandwich cookies | 56 cookies |  $56 \div 36 = 1.56$ , so **2 packs** | | Whipped topping |  $5 \frac{1}{4} \text{ cups}$  |  $5.25 \div 2 = 2.625$ , so **3 cans** | | Plastic cups | 28 | **1 pack** of 50 |

### Page 2: the yield check answers

| Option | Portions the plan makes | Clears 30? |
|--------|-------------------------|------------|
|--------|-------------------------|------------|

|   |                                                                                                                                                                                                  |                                                                                                                  |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| A | 4 lb dry pasta at 2 oz dry per portion = <b>32 portions</b>                                                                                                                                      | Yes, 2 spare                                                                                                     |
| B | 40 tortillas bought, cheese covers about 32, and pepperoni covers 150 slices $\div 5 = 30$ , but the sauce covers only 28 at 2 tablespoons each, so the limit is the <b>sauce at 28 portions</b> | No. Add 1 jar of pizza sauce (\$1.69), which moves the limit to the pepperoni at <b>30 portions</b> , zero spare |
| C | 40 tortillas bought; beans cover 28 at 3/16 cup each; cheese covers 28; salsa covers 28. Limit is the beans at <b>28 portions</b>                                                                | No. Add 1 can of beans for <b>37 portions</b>                                                                    |
| D | 3 loaves $\times$ 12 pieces = <b>36 pieces</b>                                                                                                                                                   | Yes, 6 spare                                                                                                     |
| E | 2 packs $\times$ 36 = 72 cookies $\div$ 2 each = 36; topping 3 cans $\times$ 2 cups = 6 cups $\div$ 3/16 cup each = 32; cups cover 50. Limit is the <b>topping at 32 portions</b>                | Yes, 2 spare                                                                                                     |

This is the most important table in the key. **Options B and C fail the yield check as the option cards are written, and Option E clears it with only 2 spare.** That is on purpose. A station that adds the extra can of beans (\$1.99, new total \$21.41, over budget) now has a real problem to solve in Day 2 Step 3, and the answer is the salsa line or the tortilla line. Do not tell them; let the yield check find it.

### Page 4: the costing sheet

The station totals, if a team buys exactly what the option card says: A \$18.31; B \$21.32 with pepperoni, \$16.33 without (and fails the yield check on the sauce; the fix costs \$1.69); C \$19.42 (but fails the yield check; the fix costs money); D \$18.93; E \$18.94.

Unit prices to the tenth of a cent for the most-used items, from the page 5 excerpt: spaghetti store brand \$0.081/oz; marinara 24 oz store brand \$0.116/oz; marinara 45 oz store brand \$0.111/oz; marinara 24 oz name brand \$0.166/oz; shredded mozzarella 8 oz store brand \$0.249/oz; shredded mozzarella 12 oz name brand \$0.291/oz; butter store brand \$0.249/oz; butter name brand \$0.374/oz; cookies 14.3 oz store brand \$0.209/oz; cookies 19.1 oz name brand \$0.345/oz; whipped topping store brand \$2.99/can vs name brand \$4.49/can.

### Page 6: the swaps that actually exist in this excerpt

| Swap out                          | Swap in                    | Saves per package    | On a real order                            |
|-----------------------------------|----------------------------|----------------------|--------------------------------------------|
| Name-brand spaghetti \$2.19       | Store brand \$1.29         | \$0.90               | \$3.60 on 4 boxes                          |
| Name-brand marinara \$3.99        | Store brand \$2.79         | \$1.20               | \$4.80 on 4 jars                           |
| Name-brand butter \$5.99          | Store brand \$3.99         | \$2.00               | \$2.00                                     |
| Name-brand cookies 19.1 oz \$6.59 | Store brand 14.3 oz \$2.99 | \$3.60               | \$7.20 on 2 packs                          |
| Name-brand whipped topping \$4.49 | Store brand \$2.99         | \$1.50               | \$4.50 on 3 cans                           |
| Two 24 oz marinara jars \$5.58    | One 45 oz jar \$4.99       | \$0.59 for 3 oz less | Legal only if the yield check still clears |

My own supermarket order saved **\$30.38 on a \$150 order** with four swaps of exactly this kind: name-brand cookies to store brand (\$14.40), name-brand whipped topping to store brand (\$6.00), butter from two packs to one (\$5.99), and cups from two packs to one (\$3.99). Put those four real numbers on the Day 2 slide.

### Page 6: the peer check

Sign the sheet only when all five boxes are initialed **and** you have redone the running total yourself on at least the last three lines. The signature is what lets a team move on to the shopping list in Lesson 6.15.
