

Vocabulary 03: Growing Up, Getting Along

Unit 3, Human Development and Relationships. The unit's 47 Tier 3 words across the four topics, with a one-line definition written for a grade 6 to 7 reader and a Spanish column.

Translation status. The Spanish column is my best working translation and has not been verified by a native speaker. Use it for word banks and picture cards; have a native speaker, a bilingual colleague, or the ENL teacher check the whole table once before it is printed for students. Family and feelings words are the ones most likely to differ by country and by home (a “guardian,” a “blended family,” and “peer pressure” have different everyday names across the Spanish-speaking countries), so the English term stays on every card, because students will see the English word on the babysitter’s checklist, the parent card, and the Red Cross flyer.

Two pairs matter. “Self-concept” is what you believe about yourself; “self-image” is the picture you carry of yourself and show others. “Healthy relationship” and “unhealthy relationship” are taught as a pair in Lesson 3.12 and the translations keep the same base word so the pair stays visible.

How lessons use this file: each lesson names its own Tier 3 words; the handout for that lesson carries a word bank pulled from this table in both languages. The site’s Materials page prints this table as picture-ready cards.
