

Rubric 01: Lab Rubric

Used for: every cooking lab in the year (Lab 1 Mug Cake or Scrambled Egg Tacos, Lab 2 Sheet Pan Nachos, the Budget Meal Lab, the Unit 6 regional recipe labs, and any no-kitchen lab run with the same roles). The three objective rows change with the lesson; the safety and sanitation row never changes. **Category:** Labs and projects (40 percent). **Points:** 16 (four rows, each scored 1 to 4). **Standards:** the three objective rows carry the lesson's own standards (see the lesson's Assessment table). The safety row carries NYS N&W 1. b) Demonstrate safety and sanitation procedures when handling food and equipment; CTE HSW 4. c) Apply safety practices when using tools, machines, and equipment; CTE HSW 4. d) Wear appropriate protective clothing and gear when using tools, machines, and equipment; CTE HSW 4. e) Participate in housekeeping procedures that help to establish and maintain safe working conditions in the classroom or workplace; NYS FACS Standard 1 (Intermediate) PI B: Students apply principles of food safety and sanitation.

The rubric

Write the lesson's three objectives in the left column before the lab. For Lab 1 they are filled in below as the example.

Criteria	Not Yet (1)	Approaching (2)	Meets (3)	Exceeds (4)
Objective 1 (Low). Lab 1: knew the role: described own tasks in each phase and the safety rule for each, and did them	Did not know the role's tasks without being told each one; needed the teacher to point to the card more than twice	Knew the prep task but had to check the card for later phases; did most of the role with a reminder or two	Did every task on the role card in every phase without a reminder; named the safety rule when asked	Did the role and also covered a teammate's task when they fell behind, without being asked, and without leaving own station untended
Objective 2 (Mid). Lab 1: prepared the recipe: measured accurately, followed the steps in order, used each tool the way it was taught	Skipped or reordered steps; measurements off by a lot (packed flour, heaped spoons, liquid read from above); used a wrong tool for a step	Followed the steps with one skip or one out-of-order step; one measurement clearly off; tools mostly right	Followed every step in order; every measurement done with the right tool and technique; food came out the way "done" looks on the station card	Meets, and caught a problem before it happened (a mug with dry spots at the bottom, a skillet on high) and fixed it using the recipe, not a guess
Objective 3	Reflection	Named a step	Named the step	Meets, and the

(High). Lab 1: evaluated the team's work against the flowchart and the done checklist and recommended one change for the next lab	missing or one word; no step named; no change suggested	that went wrong but not why, or suggested a change that is not connected to a step	that cost the most time or quality, explained why using the flowchart or the checklist, and suggested one change the team could actually make	change is specific to a role and a minute on the flowchart ("Prep Cook measures dry into all four mugs by minute 7 so the Head Cook is not waiting"), and it would work
Safety and sanitation (every lab, same row all year)	A safety violation: hands not washed, hair loose over food, bare hand on a hot mug or pan, a burner left on, a knife other than a butter knife, an oven door opened by a student, food dropped and served, or a station left dirty after the check. A 1 here means a conversation with me and a redo of the clean phase; it also zeroes the lab's participation score for the week (see the Grading Plan)	Hands and apron done, but one reminder needed during the lab (a towel on the burner, a handle turned out, a wet floor left, a tool put away wet)	Washed hands at the start and after raw egg; apron and hair done; handles in; mitt or paper towel for every hot thing; clean-up zone finished; station passed the check the first time	Meets, and called out a hazard for the team before I saw it, or fixed one at another station without being asked

Total: ____ out of 16

Group scoring grid (one per class, three stations)

Score each student in the row for their station. Circle the role. Notes go in the box.

Station 1 (kitchen: _____)	Role	Obj 1	Obj 2	Obj 3	Safety	Total (16)
Student 1	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 2	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 3	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 4	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 5	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 6	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 7	SM / HC / SC / PC / HelpC / TC / PB / TK					
Station 2 (kitchen: _____)	Role	Obj 1	Obj 2	Obj 3	Safety	Total (16)
Student 1	SM / HC / SC / PC / HelpC / TC / PB / TK					

Student 2	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 3	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 4	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 5	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 6	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 7	SM / HC / SC / PC / HelpC / TC / PB / TK					
Station 3 (kitchen: _____)	Role	Obj 1	Obj 2	Obj 3	Safety	Total (16)
Student 1	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 2	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 3	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 4	SM / HC / SC / PC / HelpC / TC					

	/ PB / TK					
Student 5	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 6	SM / HC / SC / PC / HelpC / TC / PB / TK					
Student 7	SM / HC / SC / PC / HelpC / TC / PB / TK					

Role codes: SM Station Manager, HC Head Cook, SC Second Cook, PC Prep Cook, HelpC Helper Cook, TC Toppings Chief, PB Plate Builder, TK Time Keeper.

Notes for the next class (what to fix, who to move, what to buy):

How to use

- Fill in the three objective rows from the lesson before the lab. The descriptors above are Lab 1's; for later labs rewrite them in the same shape (what the student did, not an adjective).
- Score Objectives 1 and 2 and Safety on the clipboard during plate and eat and during clean. Score Objective 3 from the Lab Reflection the next day.
- Objectives 1 and 2 are scored per student, not per station, because roles differ. Safety is per student too. One student's 1 on safety does not lower a teammate's score.
- A 1 on the safety row is not a punishment grade. It is a conversation and a redo of the clean phase (during lunch, after school, or the next lab's first five minutes). The number stays a 1; the redo is how the student shows the routine. This matches the Grading Plan: a safety violation zeroes the week's participation and safety score, and the lab rubric records it.
- Students copy their four numbers into the FACS folder that stays in the room, so they can see their own trend across labs.
- Absent students do the written lab alternative (recipe analysis or the no-kitchen task) and are scored on Objectives 1 to 3 only, out of 12, then scaled to 16.
