

## Rubric 06: Feed the Class

**Project:** Project 06 - Feed the Class.md **Unit:** Unit 6, From Farm to Table (Food Systems and Production) **Total:** 20 points (five criteria, 1 to 4 each). Labs and projects category (40 percent). **Not this rubric:** the cook day lab score is taken separately on Rubric 01 - Lab Rubric.md (three objectives plus the safety and sanitation row, 16 points), which is the lab rubric used for every lab in this course. Do not write a new lab rubric for this project.

Station: \_\_\_\_\_ Dish: \_\_\_\_\_ Date scored: \_\_\_\_\_

### Self-assessment (the team fills this row first, before the teacher scores)

| Criterion                                              | Our score (1 to 4) | One sentence of evidence, naming a page, a block, or a number |
|--------------------------------------------------------|--------------------|---------------------------------------------------------------|
| 1. The scaling math and the yield                      |                    |                                                               |
| 2. The cost and the shopping list against the budget   |                    |                                                               |
| 3. The flowchart and the station card                  |                    |                                                               |
| 4. The cook day: safety, teamwork, and the clean check |                    |                                                               |
| 5. The reflection                                      |                    |                                                               |

### Teacher rubric

| Criterion                                                                                                  | Not Yet (1)                                                                                                                                                   | Approaching (2)                                                                                                                                                                            | Meets (3)                                                                                                                                                                       | Exceeds (4)                                                                                                                                                             |

### How to use this rubric

- Hand it out with Project 06 - Feed the Class.md in Lesson 6.12, day one of the project. Teams plan against it. Nothing on it should be a surprise on day eight.
- Score criteria 1 and 2 from the signed papers, not the drafts: the scaling table and yield check signed at the end of Lesson 6.13 Day 1, and the costing sheet signed at the end of Lesson 6.13 Day 2 plus the station's initialed rows on the approved consolidated list from Lesson 6.15. The revision counts; a team that came in over and fixed it correctly scores at Meets, not below.
- Score criterion 3 from the poster and the station card as they stood at the end of Lesson 6.14, plus the paired station's one question and whether it got answered. Do not penalize a picture flowchart card; it counts as a real card if a substitute could follow it.
- Score criterion 4 live on cook day, on the same clipboard as Rubric 01 - Lab Rubric.md, across both days of Lesson 6.16 plus the service in Lesson 6.17. A team where half the students cooked on Day 1 and half on Day 2 is scored on both days together, not on the cooking day alone; the prep and service work counts as fully as the cooking.
- A safety violation on cook day is an individual zero for that day's participation under the grading plan, is handled as a conversation and a redo of the clean phase rather than a lecture, and caps the team at Approaching on criterion 4 for that day. One student's violation does not lower a teammate's Rubric 01 score, which is individual.

- Score criterion 5 from the reflection sheet collected at the end of Lesson 6.17. The Meets bar is a named block, line, or step. Ask the pushing question once during the lesson (“Which block? Which minute? Who?”) so the writing has a chance to clear the bar.
- The team fills the self-assessment row before the teacher scores. A team whose self-scores match the teacher’s within one point on every criterion earns the Exceeds on criterion 5 if the rest of that row is met; honest self-assessment is part of the work.
- Every descriptor is written as what the team actually did. If a team’s work does not match any box, pick the closest and write why on the notes line.
- Return the scored rubric at the start of Lesson 6.18 Day 2, before the review game and the test. Students copy their five numbers into the FACS folder that stays in the room.
- A student absent on a cook day is scored on criteria 1, 2, 3, and 5 with the team and on criterion 4 from the written lab alternative (a step-by-step analysis of their own station card), per the grading plan. Nobody loses project points for being sick.
- A late folder is accepted with a one-level drop on one criterion, never a zero.
